Note:

- Only companies identified on this list may perform lining work on tanks.
- As of May 16, 2012, BUSTR regulations no longer allowed the use of tank lining as the sole method of meeting cathodic protection requirements.
- Underground tanks lined prior to May 16, 2012, for cathodic protection purposes, may continue to operate provided that the lining is periodically evaluated in accordance with BUSTR regulations.
- Pursuant to Chapter 3404.2.7.11 of the Ohio Fire Code, tanks may continue to be lined for quality assurance and compatibility purposes.
- As a reminder, please obtain a permit from the authority with jurisdiction prior to performing lining work.
